

Feelings Diary (Group 14) Checkpoint

Project Description

Our application allows users to record their feelings throughout the day and respond to previous entries. The application also keeps track of the user's previous emotions and reminds the user to submit an entry daily.

Key Functionality

- Main place to write down feelings during the day
- Customizable profile
- Mental health resources
- Calendar to help user stay organized
- Assessment to concretely rank how user is feeling
- Users can respond to past thoughts with resolutions they come up with
- Notifications reminding user to check in
- Includes a visual aide to track feelings over a period of time

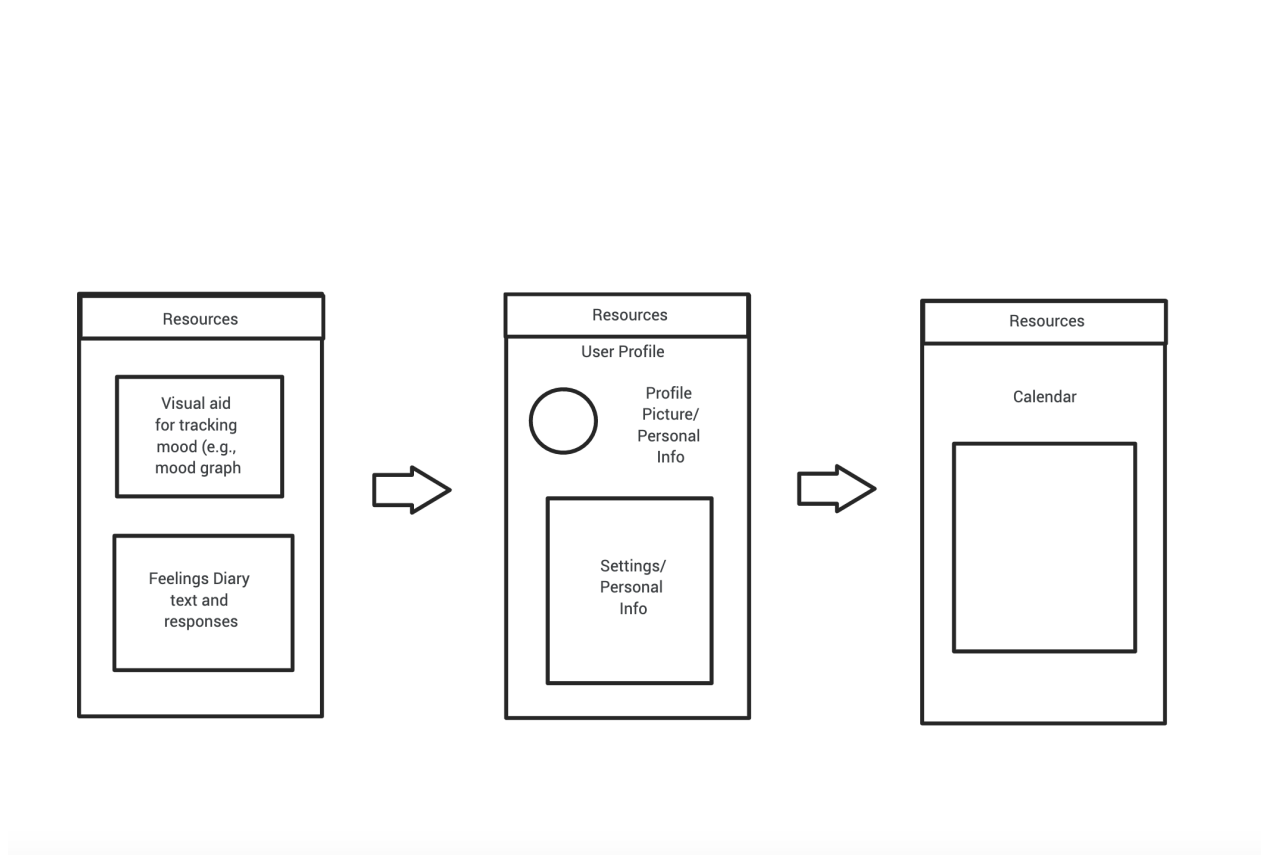

Components

- Notifications
- Fragments
- Database for accounts
- Graphics
- Server for getting and posting user data
- Permissions

List of Work Items To Do

- Jordan - Login/Sign-up, Profile Page
- Camille - Calendar and Resources
- Andrew - Visual Aid and Diary Text

Storyboard

Team Member Evaluations

Andrew Lambeth: It has been a pleasure working with Andrew. He contributes good ideas and is very organized.

Camille Joie De Jesus: Camille is a very helpful teammate, and has very good communication skills. She also comes up with good ideas and ensures we all stay on track with meeting regularly.

Jordan Barton: I put out an effort to be a supportive team member, and try to help start conversations I think we should have to be able to successfully complete this project. Overall, I think every one on the team contributes an equal amount.
